

RSoft Design Group Names Anomaly Israeli Distributor

August 26, 2004-Ossining, NY-RSoft Design Group, the leader in photonics design and simulation software for the photonics, telecommunications and semiconductor industries, today announced it has signed a distribution agreement with Anomaly to sell and market RSoft's suite of design software in Israel.

RSoft develops and markets an award-winning family of software tools that address design challenges ranging from the physics of component modeling to the business implications of planning networks. Their newest software tool, *DiffRACTMOD*, targets the design and analysis of periodic and diffractive structures. Other device tools include *BeamPROP*, a premier product for waveguide and fiber optics, *FullWAVE* and *BandSOLVE*, a complete solution for the design of photonic crystal design, and *LaserMOD*, a simulation tool for semiconductor lasers. System and network tools include *OptSim*, a tool to design and validate optical transmission systems, and *MetroWAND*, a network planning tool.

"RSoft, providing both software tools and expertise, is a great asset for all companies, government labs and academic institutions in the photonics, telecommunication and semiconductor community. We are pleased to be able to provide their extensive array of tools in Israel," states Anomaly CEO Alon Ashkenazi.

For more information regarding RSoft Design Group, please visit our website at www.rsoftdesign.com or call us at (914) 923-2164. To contact Anomaly, please visit www.anomaly.co.il or call 972-54-6586624. RSoft Design Group will also be exhibiting at ECOC 2004, Booth# 218 in Stockholm, Sweden on September 6-8th, 2004.

About RSoft Design Group

Offering a comprehensive suite of design and business analysis software solutions to the telecommunications, semiconductor and photonics industries, RSoft Design Group is the only company that provides a full range of simulation and planning software and services across the entire component to network-level hierarchy. The company's award-winning products are used by researchers, manufacturers, systems integrators, and service providers to address design challenges ranging from the physics of component design to the business implications of planning networks. RSoft Design Group, Inc. is a privately held corporation with global marketing operations worldwide and offices in the US, Japan and Europe. For more information, visit www.rsoftdesign.com.
